

Who Should Attend?

In accordance with U.S. Navy and Corps of Engineers requirements, the Contractor Quality Control (CQC) Managers on all Corps and NAVFAC administered construction contracts must have successfully completed this certification course no later than 60 days following notice to proceed.

Because CQM can be applied successfully to private-sector work, all managers in charge of quality – at both general and sub-contractor companies – will benefit from this course.

About the Instructor

John E. Parker III, PMP, has a 43-year career in the construction industry, with 20 years in the private sector and 23 years in the public sector. He has extensive new construction and renovation experience in industrial, commercial and residential projects. John is a recognized professional facilitator for Construction Quality Management Training. He currently serves as a construction-industry consultant, teaching quality control and quality assurance to all levels of experience. He also provides coaching to upper management for design and implementation of the quality control process in construction and assists designers with contract specifications and conducting on-site reviews.

This course qualifies for CEUs for the Utah General Contractor's License and the Georgia Residential/Light Commercial License.

The CQM certification is required for most Corps of Engineers and Navy construction contracts. This course provides training on the CQM concepts and procedures used in Naval Facilities Engineering Command and Corps of Engineers construction contracts. These concepts fit perfectly with commercial construction work, taking CQM down to the working level and familiarizing participants with the importance of the “soft” parts of the contract—safety, quality, environmental, etc.

Attendees who successfully complete the course will receive a certificate that is required by Corps and Navy construction contracts. The certificate is valid for 5 years. Attendees also receive a student workbook and a CD containing the forms needed to run a CQM program.

CQM - Construction Quality Management for Contractors

Associated Builders and Contractors of Georgia, Inc.

The Construction Quality Management (CQM) Course offers individuals the opportunity to satisfy the training requirement specified in most Corps of Engineers and Naval Facilities Engineering Command construction contracts. The course must be taken and passed by any contractor aspiring to do work for the Corps or NAVFAC. To successfully complete this course, students must be present for all sessions and achieve a grade of 70 or higher on the written test administered at the end of the course.

What You Will Learn:

- ✓ What is CQM, and why should you use it?
- ✓ How reviewing documents can help prevent delays
- ✓ Quality Management Planning – QC plans, the three phases of control and preventing re-work
- ✓ Teamwork and building trust – the importance of coordination meetings
- ✓ Submittals – identifying long lead times, including in the schedule
- ✓ Quality management during construction – QC responsibilities
- ✓ Making the system work – how to maximize profits and avoid delays and re-work
- ✓ The “how to” of Government CQM and applying it to the private sector.

When: **Thursday, February 9, 7:30 a.m.—4:30 p.m.**
