

April 21, 2009

United States Congress  
Washington, DC 20515

Dear Member of Congress:

We, the more than 3,000 undersigned construction companies and related firms, are writing to express our strong opposition to the deceptively named “Employee Free Choice Act” (H.R.1409 and S.560). The key provisions in this legislation represent egregious attempts to limit the rights of employees and employers and will severely diminish the ability of our firms to succeed in our globally competitive market.

It is also our intention to make clear that there is **no room for compromise** on this piece of legislation. Our firms stand together in stating that there is nothing that can be done to make this legislation more palatable and that Congress should vote down this bill in all forms.

The economic hardships facing our nation have acutely impacted the construction industry. Our industry has seen historic highs in job losses over the last year, with over 126,000 jobs lost in our industry in March 2009, and over 1.3 million jobs lost since January 2007. Overall, construction workers account for one-fifth of the job loss in our country and the construction industry can not shoulder the additional burden this legislation would impose.

A recent study by Dr. Anne Layne-Farrar, a highly regarded economist from the non-partisan firm LECG Consulting, titled “An Empirical Assessment of the Employee Free Choice Act: The Economic Implications,” finds that if this legislation were signed into law it would likely increase the unemployment rate and decrease job creation substantially. In fact, Dr. Layne-Farrar predicts that the “Employee Free Choice Act” being signed into law will cost the U.S. economy 600,000 lost jobs in the year 2010 alone. This is not what the construction industry needs in this time of massive layoffs and economic unrest.

As the unemployment rate is climbing and construction jobs are disappearing, the “Employee Free Act Choice Act” will only further aggravate the economy and make these trying times worse. For all of these reasons, we urge you to oppose the mis-named “Employee Free Choice Act” in all forms.

Sincerely,

1st Electric Contractors, Inc.
